

BC-03

Pure Glass Coating

Modesta® 
 PLUS CREATION TECHNOLOGY

BC-03 Pure Glass Coating

The inorganic nature of the BC-03 glass coating makes it fully resistant to oxidation and therefore effective for protecting precious automotive paint. The hard physical barrier it creates prevents the paint from coming into contact with the airborne elements, and acts as a strong anti-scratch protection. The pure liquid glass layer it creates reflects light with specific wavelengths, producing an instant luminous shine and gloss.

Modesta BC-03 is the hardest of our coatings and is thus especially suitable to deliver long-lasting scratch and wear protection with a special hydrophilic water behavior that is effective against forming of water spots and contamination deposits.

It does not crack, bubble, flake, peel, delaminate, detach or discolour at temperatures up to 800 °C.

Properties of BC-03 at a glance:
(compared to other products of the Modesta line)

Heat resistance	● ● ● ● ●

Durability	● ● ● ● ●
Water repellency	● ● ● ● ●
Shine	● ● ● ● ●
Scratch protection	● ● ● ● ●
Self-cleaning	● ● ● ● ●
Maintenance	● ● ● ● ●

Modesta BC-03 requires reasonable regular maintenance and delivers long-term protection. It is suitable for all colours and cars daily driven in harsh environments.

Maintenance should always be performed by a professional with the required skills and equipment. The Modesta M1 SHOT and Modesta H-04 Shampoo with water repellent effect should always be used for maintenance of a vehicle protected by BC-03.
