

BC-04

Nano-Titanium Glass Coating

BC-04

Nano-Titanium Glass Coating

A new formula coating that combines the best advantages of the original Pure Liquid Glass coatings and highest quality nanograde titanium dioxide. This combination creates a deeper shine and spectacular reflections on the paint.

Modesta BC-04 creates an extremely hard physical barrier that prevents paint from coming into contact with airborne elements and acts as a strong anti-scratch protection.

Modesta BC-04 is fully capable to withstand temperatures of up to 900 °C and deliver a special hydrophilic water behavior that prevents mineral and other deposits (hard water spots).

Properties of BC-04 at a glance:
(compared to other products of the Modesta line)

Heat resistance	• • • • •
Layer thickness	• • • • •
Durability	• • • • •
Water repellency	• • • • •
Shine	• • • • •
Scratch protection	• • • • •
Self-cleaning	• • • • •
Maintenance	• • • • •

Modesta BC-04 requires reasonable regular maintenance and delivers long-term protection. It is especially suitable for dark-coloured daily driven vehicles.

Maintenance should always be performed by a professional with the required skills and equipment. The Modesta M1 SHOT and Modesta H-04 Shampoo with water-repellent effect should always be used for maintenance of a vehicle protected by BC-04.
