

BC-05

Advanced Water-repellent Glass Coating

BC-05

Advanced Water-repellent Glass Coating

Modesta BC-05 is a unique glass coating based on a three dimensional molecular frame. It forms a highly durable clear hard glass layer on automotive paints.

BC-05 produces a deep shine and helps to protect the paint from all kinds of damage including wash induced damage, scratches, oxidation, sap, watermarks, salts, acids and even permanent ink and paints. It's strong water-repellent properties also promote the self-cleaning effect of the coating.

BC-05 produces a unique kind of gloss, also called the "candy-like" gloss, that adds unique reflections and saturation to the paint of a vehicle. The coating also reduces drag by 5 km/h compared to regular paint at speeds over 60 km/h (drag coefficient: -0.02).

Self-cleaning	● ● ● ● ●
Maintenance	● ● ● ● ●

Modesta BC-05 requires thorough and regular maintenance and delivers long-term protection. It is especially suitable for exclusive vehicles that can take advantage of professional care.

Maintenance should always be performed by a professional with the required skills and equipment. The Modesta M1 SHOT and Modesta H-04 Shampoo with water-repellent effect should always be used for maintenance of a vehicle protected by BC-05.
